	Aggregate data

	Election
	Germany, European Parliament Election, 2009
Germany, NUTS 1, NUTS 2, NUTS 3.	

	Data was collected at Kreise level.
--	-------------------------------------

NUTS structure and electoral units:

Data was collected on kreise level. In most cases the kreise level is in accordance with the NUTS 3 level.

Note that in some cases, the data published from the Federal Returning Officer deviates from the latest official NUTS 3 structure (2007). This concerns especially the kreise-level in Sachsen and in Sachsen-Anhalt. See http://ec.europa.eu/eurostat/ramon/nuts/home_regions_en.html and <http://www.bundeswahlleiter.de/en/index.html> for further details.
