	Data was collected on country level (NUTS 3). Note that the country of Luxembourg comprise one NUTS 3 unit.
	Norwegian Social Science Data Services (NSD)

NOTE! Under Luxembourg's electoral system, the country is divided into four multi-member constituencies: Centre, Est, Nord, and Sud. Voters may vote for as many candidates as the region elects Deputies. This causes the number of valid votes

to exceed the number of persons entitled to vote and number of votes (which thus refers to the amount of people actually putting down one or several votes). Party votes add up to number of valid votes.

Abroad votes: not available
