Introduction and preliminary remarks

The variable reports of the Standard & Special Eurobarometer survey series offer a comprehensive description of the data on study and variable level. For each Eurobarometer individual variable reports are provided. The reports are structured into five sections: Section one provides the description of the respective Eurobarometer Study, including bibliographic information, abstract, methodological specifications, remarks on weighting and general notes on data preparation. Section two gives an historical overview of the Eurobarometer Survey Series, including the institutional background and the development of geographical and topical coverage. A third section provides general information about the structure of Eurobarometer datasets, documentation standards and variable coding frames. Section four explains the details of the 'Variable Documentation' part in the following section five, which is the documentation of the variables with the complete question texts and answer categories of the master questionnaire and the corresponding archival remarks on data preparation or inconsistencies, if applicable. In addition, this variable report contains frequency counts, by country (sample), for almost all variables. These frequencies are based on weighted data using the adequate post-stratification weight, if applicable and as indicated in each table.

Data access

Primary data for statistical analysis and related documentation (basic bilingual questionnaires, national field questionnaire versions and variable reports) are made available online by GESIS (http://zacat.gesis.org), by the Inter-university Consortium for Political and Social Research through the ICPSR membership network, and through all Social Science Data Archives members of the Council of European Social Science Data Archives (CESSDA).

Usage requirement

To provide funding agencies with essential information about use of archival resources and to facilitate the exchange of information about related research activities, users of the data are requested to send to ICPSR or GESIS respectively bibliographic citations for each completed manuscript or thesis abstract. Please indicate in a cover letter which data (surveys and respective variables) were used.

Disclaimer

The original collector of the data, ICPSR, GESIS, and the relevant funding agencies bear no responsibility for uses of this collection or for interpretations or inferences based upon such uses.

1 Study Description – Eurobarometer 41.0

1.1 Bibliographic information

1.1.1 Archive study numbers

GESIS: ZA2490
ICPSR: 6422

Under a co-operative arrangement for the archival processing and distribution of Standard & Special Eurobarometer, ICPSR and GESIS employ its own study number to identify each – otherwise congruent – dataset.

1.1.2 Title and archive subtitle

Eurobarometer 41.0
Trade Issues, Blood Donation, AIDS, and Smoking
March - May 1994

1.1.3 Principal investigators

1.1.4 Bibliographic citation

Publications based on data collections which are made available through ICPSR or GESIS, should acknowledge those sources by means of bibliographic citations. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in footnotes or in the reference section of publications. The bibliographic citation for this data collection is:

> European Commission, Brussels: Eurobarometer 41.0, March-May 1994.
> International Research Associates (INRA), Brussels [Producer];
> GESIS, Cologne [Publisher]: ZA2490, dataset version 1.1.0, doi:10.4232/1.10909.

1.2 Content

1.2.1 Abstract

This round of Euro-Barometer surveys queried respondents on standard Euro-Barometer measures such as public awareness of and attitudes toward the Common Market and the European Union (EU), and focused on perceptions about and factors affecting blood and plasma donation. Questions solicited opinions about the way blood and plasma are collected and handled, reasons for donating, understanding of the differences between blood and plasma, the necessity of rewards for donating, and sources of information about blood or plasma donation. Respondents were also surveyed about their perceptions of product quality based on country of manufacture, crossborder purchases and customs experiences, a single European currency, women´s opinions on EU matters, tobacco smoking habits, AIDS risks, and perceived cancer risks of food products. On EU matters, respondents were asked how well informed they felt about the EU, what sources of information about the EU they used, whether their country had benefited from being an EU member, and the extent of their personal interest in EU matters. This survey also includes respondent opinions and party preferences for the June 1994 European elections.

Demographic and other background information was gathered on number of people residing in the home, size of locality, home ownership, trade union membership, region of residence, and occupation of the head of household, as well as the respondent´s age, sex, marital status, education, occu- pation, work sector, religion, religiosity, subjective social class, left-right political self-placement, and opinion leadership.

1.2.2 Topic classification

- International Institutions, Relations
- Political Attitudes and Behavior
- Communication, Public Opinion
- Patterns of Consumption
- Medicine

1.3 Universe

The EURO-BAROMETER 41.0 covers the population of the respective nationalities, aged 15 years and over, in each of the Member States of the European Community. In addition, separate national surveys were conducted independently in Norway and Finland.

1.4 Sampling procedure

The basic sample design applied in all Member States is a multi-stage, random (probability) one. In each EC country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density. For doing so, the points were drawn systematically from all ´administrative regional units´, after stratification by individual unit and type of area. They thus represent the whole territory of the Member States according to the EUROSTAT-NUTS II and according to the distribution of the national, resident population in terms of metropolitan, urban and rural areas. In each of the selected sampling points, a starting address was drawn, at random. Further addresses were selected as every Nth address by standard random route procedures, from the initial address. In each household, the respondent was drawn, at random.

Non-national EU Citizens Oversample

In this Euro-Barometer an oversample of non-national but EU citizens was added for experimental purposes. On top of the normal 1000 national respondents, a varying number of EU citizens has been added which had to have one of the other eleven nationalities. This oversampling does not apply for Norway and Finland. In total 373 extra interviews were made, in accordance to the proportion of non-nationals in each country.

People Responsible for Shopping Oversample

Also, another oversample of ´people responsible for shopping´ (D19A) was added. 300 extra-respondents per country (except Northern Ireland, Finland and Norway) were asked only a limited subset of questions: the substantive questions Q.1 to Q.15, a selection of demographics (D.7, D.8, D.10, D.11, D.12, D.14, D.15A/B, D.19A/B, D.25 and D.29) and the usual protocol variables (P.1 to P.7).

The effective number of realized interviews in this round is indicated in table 1.

1.5 Fieldwork

Between March 8 and May 10, 1994, INRA (EUROPE), a European Network of Market and Public Opinion Research Agencies, carried out wave 41.0 of the STANDARD EURO-BAROMETER, on request of the EUROPEAN COMMISSION.

Table 1: Participating countries (regions) and fieldwork information for Eurobarometer 41.0

Country (Region)	ISO	Fieldwork start/end	Survey Research Institute	Questionnaire-versions	Sample Size (n of cases)

1.6 Mode of data collection

All interviews were face-to-face in people´s homes and in the appropriate national language.

1.7 Weighting

In general the Standard and Special Eurobarometer data sets provide for two types of weighting, a post-stratification sample weighting and a population size weighting.

For each sample, i.e. participating country or lower level region, a comparison between the sample composition and a proper universe description is carried out for internal weighting purposes. The universe description is made available by the National Survey Research Institutes and/or by EUROSTAT. On this basis a national weighting procedure, using marginal and intercellular weighting, is applied. As such in all countries, minimum sex, age, region NUTS II (basic regions as defined by the EUROSTAT nomenclature of territorial units for statistics), and size of locality are introduced in the iteration procedure. This **post-stratification weighting** is also referred to as redressment or non-response weighting. A design weight which would adjust for unequal selection probabilities (depending on the household size) is not made available.

For the descriptive analysis of individual samples or their comparison, up to six weighting variables are provided in each data set and documented as such in the variable description. Until Eurobarometer 31 the corresponding weight variable is labelled NATION WEIGHT II. Weighting factors were then not included continuously for all samples and weighting procedure might have differed from the foregoing description. While weighting usually reproduces the real number of cases for each sample, between Eurobarometer 33 and 54.1 samples can also be adjusted to their predefined standard size of exactly 1000 or 500 cases. This option was applied for the official Eurobarometer reports of the period.

The **population size weighting** factor corrects for the fact that most samples are of almost identical size, no matter how large or small the populations are from which they were drawn. These weights ensure that each country as well as each lower level sample (Great Britain and Northern Ireland, East and West Germany) are represented in proportion to its population size within different groupings, or according to the historical states of European unification (e.g. founder members, new members, Euro zone) in the case of the EUROPEAN WEIGHTS, or for the United Kingdom (WEIGHT SPECIAL UNITED KINGDOM, NATION WEIGHT I until Eurobarometer 31A) and for Germany as a whole (WEIGHT SPECIAL GERMANY).

The population size weights all include the post-stratification weighting factors. The EUROPEAN WEIGHTs adjust each sample in proportion to its share in the total population of the European Union (formerly European Community), aged 15 and over. These adjustments are based on population figures published by EUROSTAT in the Regional Statistics Yearbook. In some cases more than 20 European weights are provided for use in analyses of the European Union population as a whole or in accordance with its historical compositions. Between Eurobarometer 33 and 54.1 adjustments to the predefined standard sample size is taken into account. In general all samples which do not belong to the respective group of samples under consideration are excluded from calculation.

The application of post-stratification weights is recommended for descriptive (univariate) analysis. Meaningful descriptive results for groups of countries or for countries with separate samples (United Kingdom and Germany) require population size weighting. Official Eurobarometer reports are always based on weighted data.

Starting with Eurobarometer 66.2 a new additional weight (WEIGHT EXTRA) is provided which extrapolates the

actual universe (population aged 15 or more) for each country or sample. This weight variable integrates all other available weights, but does not reproduce the number of cases in the data set, but the respective actual population size.

As needed, OVERSAMPLES (see chapter 2.4, table 4) are weighted separately as documented in the respective study and weight variable description. In some surveys special weights are made available for application with selected variables on a specific topic, e.g. for the descriptive analysis of variables regarding e-communication equipment on HOUSEHOLD level.

EUROBAROMETER 41.0 provides four (post-stratification) NATION WEIGHTS for the EU member countries: WEIGHT RESULT FROM TARGET (NATION WEIGHT IIa) and WEIGHT ADJUSTED TO STANDARD SIZE (NATION WEIGHT IIb) for separate analysis or comparison of individual samples (countries or regions on sub-national level), WEIGHT SPECIAL UNITED KINGDOM (NATION WEIGHT I adjusted to standard size) which in addition adjusts the British and the Northern Irish samples to their respective proportions in the United Kingdom for descriptive analysis of the United Kingdom as a whole and WEIGHT SPECIAL GERMANY (NATION WEIGHT III adjusted to standard size), which adds the adjustment of the East and West German samples to their respective proportions in the United Germany, to be used for descriptive analysis of the United Germany as a whole. All other samples (nations) are included, likewise all post-stratification factors, except Norway and Finland. A separate (post-stratification) NATION WEIGHT is provided for Norway: WEIGHT (RESULT FROM TARGET) NORWAY and for Finland: WEIGHT (RESULT FROM TARGET) FINLAND.

The different EUROPEAN WEIGHTS provide adjustments for each (national) sample in proportion to its share in the total population aged 15 and over, of the European Union, within groups of member countries representing different historical states of European integration (e.g. EURO6 = six founder members). All post-stratification factors are included. Norway and Finland are excluded from calculation.

In addition, this Euro-Barometer contains separate weight variables appropriate for its two oversamples (see 1.4).

In order to produce results for NATIONALS only (for a valid comparison with previous Euro-Barometer surveys), one should filter the data with V538 and use weights ´W1´ to ´W8´ (V6 V8 V9 V11 to V15).

In order to focus on the entire target (i.e. national and non-national EU citizens) one should filter the data using variable V536 and use weights ´WN1´ to ´WN8´ (V18 to V25).

Finland and Norway as non-EU countries are exceptions and should be weighted using V16 (WEIGHT NORWAY) and V17 (WEIGHT FINLAND) respectively.

"NATIONALS" filter variable V535 includes Norway and Finland. Filter variables V535, V536 and V538 do all exclude the second oversample of ´people responsible for shopping.´

In order to analyse questions Q.1 to Q.15, both in the standard and in the RESPONSIBLE FOR SHOPPING OVERSAMPLE, one should filter the data using split variable V537 and weights ´WO1´ to ´WO8´ (V26 to V33). V537 is coded ´1´ for oversample respondents and standard respondents (both nationals and non-nationals) that are ´responsible for shopping,´ i.e., coded ´1´ in V451 (D19A). Finland and Norway are not included in the ´people responsible for shopping´ oversample.

For more detailed information on the individual weights please see the corresponding variable description.

1.8 Data preparation

The data received by ICPSR from INRA (Europe) were checked for missing and duplicate records, for illegal (wild) codes and for consistency of response patterns. Errors discovered by these procedures were corrected or noted in this codebook. Indices and other derived summary variables were also checked and corrected as necessary. Complete machinereadable documentation was also created for this dataset by ICPSR.

ICPSR has either added "<NA>" codes to indicate responses that had no code values in the original data (system missing values) or recoded variables to the "<NA>" value if the variable had been inappropriately coded. Illegal (wild) codes which ICPSR has been unable to document have been labeled as "<Undocumented Code>" where they appear in this codebook. In some instances, for explanatory purposes, ICPSR has retained the descriptions of codes which are not used, but were available in the questionnaire. Users should also note that on occasion the number of responses to a particular question may exceed the maximum indicated in the interviewer instructions.

Question text and contingency text appearing in this codebook and ICPSR´s machine-readable documentation is taken from INRA (Europe)´s English language version of the questionnaire. Whenever a discrepancy occurs between INRA (Europe)´s codebook and its English language questionnaire as to the coding scheme of a variable, the former is followed in the ICPSR documentation.

2 Eurobarometer Series Description

2.1 Series name

The Standard and Special Eurobarometer (a.k.a. Euro-Barometer) Survey Series

2.2 Series information

The Standard and Special Eurobarometer surveys are the products of a unique program of cross-national and cross-temporal survey research. The effort began in early 1970, when the Commission of the European Communities sponsored simultaneous surveys of the publics of the European Community. In general they are carried out in spring and fall of each year. Three pilot studies were conducted in 1970, 1971 and 1973 under the header of European Communities Studies; "Attitudes towards Europe" (GESIS id ZA0078), the very first comparative survey across European Communities founder members in 1962, can be seen as an early forerunner. The primary data of the first explicit Eurobarometer, conducted in spring 1974, have not been preserved.

2.3 Principal investigators and institutional background

The Eurobarometer program was initially launched and managed until 1986 by Jacques-René Rabier, head of the Commission's press and information directorate and afterwards special advisor to the Commission of the European Communities. He counted with the political support of the European Parliament and the close co-operation of Ronald Inglehart. The political scientist at the University of Michigan was then developing his theory of value change in modern societies and his materialist/post-materialist items would become integral part of the Eurobarometer until the mid nineties. Between 1987 and 1996 the program was continued and considerably enlarged under the direction of Karlheinz Reif, since 1993 together with Anna Melich.

Anna Melich took over the Eurobarometer direction from 1997 to 1999, by then still within the organizational framework of the former Directorate-General X, Public Opinion Surveys and Research Unit. In 2000/2002 Eurobarometer were intermittently conducted in the framework of the DG Education and Culture, Citizens´ Centre - Analysis of Public Opinion under the direction of Harald Hartung, and starting with Eurobarometer 54 under DG Press and Communication, initially directed by Thomas Christensen. Since 1999 the organisation and supervision of the surveys were consecutively executed by Rubén Mohedano-Brèthes (until 2002) and Renaud Soufflot de Magny (until 2006), with Antonis Papcostas as head of unit between 2003 and 2010.

The main survey results are regularly published on the European Commission's Public Opinion website in official standard and special topic reports.

2.4 Development of geographical and population coverage

In all European Union (formerly "European Communities") member countries Standard Eurobarometer samples were initially drawn among the national population, aged 15 and over. Starting with Eurobarometer 41.1 the target population is the population of any nationality of an European Union member country, aged 15 years and over, resident in any of the Member States. For test purposes Eurobarometer 41.0 included a non-national European Union citizens oversample.

Eurobarometer regularly include all member countries, starting with the six founder members and in accordance with the subsequent enlargement process. Norway has been in-officially included in selected waves between 1989 (EB34) and 1996 (EB46), Finland started before the actual enlargement in 1993 (EB39.0), and a few Swiss Eurobarometer were run in parallel to selected waves or topics starting in 1999 (EB51.1) in Switzerland. Candidate Countries (CC) and Accession Countries (AC) for the Eastern enlargement process were first surveyed in the Candidate Countries Eurobarometer series (2001-2004) and then all included in the standard series, even before accession as in the cases of Turkey or Macedonia.

Additional samples are drawn for Great Britain and Northern Ireland almost from the start, in Germany (East and West) after the re-unification in 1989, and in Cyprus for the Turkish Cypriote Community (Northern Cyprus) since 2004 for selected standard and topical waves.

Table 2: EU enlargement and countries covered by Standard and Special Eurobarometer

		Norway	NO	1000	

The regular standard sample size (in the sense of completed interviews) in Eurobarometer surveys is 1000 respondents per country, except small countries like Luxembourg or Malta. The 44.2bis MEGA-survey increased the standard sample up to 6000 respondents (for the largest countries) in order to achieve more confidence for analysis on sub-national level.

Oversamples have been drawn intermittently if required by the topic, i.e. to ensure that there are enough members of the relevant population subgroup to report sufficiently reliable estimates. Intentionally more people are selected from the respective group than would typically be done if everyone in the sample had an equal chance of being selected.

Table 3: Oversamples for special topic Eurobarometer

Topic	(Over-)Sample	Eurobarometer Survey
Young Europeans	Youth aged 15-24	17, 28.1, 34.2, 47.2OVR, 55.1OVR
Elderly Europeans	Elderly aged 60+	37.2
Consumer Behaviour	Responsible for shopping	41.0
Unemployment	Unemployed	44.3OVR
Working Conditions	Professionally active	37.0+1, 39.0+1
Drug Abuse	Youth aged 15-24	43.0+1, 57.2OVR
Education Issues	Youth aged 15-24	44.0 / 44.1 (data not integrated)

2.5 Standard question program and special topics

Standard Eurobarometer surveys were designed to provide a regular monitoring of the social and political attitudes among the European publics, to obtain regular readings of support for European integration, public awareness of and attitudes toward European unification, the institutions of the European Community / European Union, and its policies in complementary fashion. Attitudes toward the organization and role of the European Parliament and electoral behavior became a major topic in pre- and post- European Elections times. The standard program was complemented by measures of general socio-political orientations, of subjective satisfaction and the perceived quality of life, or of cultural, national and European identities.

Intermittently Standard Eurobarometer have investigated SPECIAL TOPICS, such as agriculture, biotechnology, energy, environment, family planning, gender roles, health related issues, immigration, poverty and social exclusion, regional identity, science and technology, information society, working conditions, urban traffic, knowledge of languages etc. In the case of some supplementary studies, special youth and elderly samples have been drawn (see table 4).

Starting with Eurobarometer 34 (1990) additional supplementary surveys on special issues have been conducted under each main wave number, identified by dot-separated sub-numbers for each individual survey. Usually only one survey per main wave includes the standard and trend module with focus on European integration issues. The following list (table 5) identifies the surveys containing the standard module and with results reported in the corresponding official standard report, or which at least include a subset of standard indicators, or with focus on European integration in a special topic context (e.g. "The future of Europe" in Eurobarometer 65.1).

Table 4: Overview of Eurobarometer surveys with standard EU and trend question modules

Standard and trend surveys	Fieldwork Dates	GESIS ID	Standard Report	Special topic	Subset
Eurobarometer 34.0	Oct-Nov 1990	ZA1960	X

Further and regularly updated information on the Eurobarometer survey series is provided through the GESIS Eurobarometer Data Service micro-site: http://www.gesis.org/eurobarometer

3 Dataset structure and standards

Standard and Special Eurobarometer are processed and documented by the Inter-university Consortium for Political and Social Research (ICPSR) and by the GESIS Data Archive department in accordance with agreed standards, which may in some details diverge from the usual ICPSR or GESIS archive standards. In addition and as long as reasonable it was adhered to standards once established for the Eurobarometer series in the course of the years.

3.1 Dataset structure

In general the variable structure of the analysis dataset is aligned to the basic bilingual questionnaire, preceded by a set of technical variables. These comprise the archive identification variables (archive study and version id), the survey identification variables (wave and unique respondent id), and several standard NATION variables identifying the different samples (countries or regions) and relevant groups of samples in the dataset with the corresponding WEIGHT variables provided by the fieldwork institutes (see 1.7). A special alphanumeric NATION variable is provided based on the ISO 3166 country code standard for the purpose of breaking down variables by sample in terms of clearly summarized cross-tabulations.

The questionnaire variables usually consist of three types, the substantial questions (Q), the Eurobarometer standard demographics (D) and the interview protocol variables (P). The dataset is concluded by constructed index variables (C), usually as provided by the fieldwork institute, by a questionnaire SPLIT variable if applicable, and by further original identification variables.

Variable names consist of the standard prefix 'V' and the consecutive variable number, except ISOCNTRY and VERSION variables if subsequently added to older datasets. Variable labels are standardized in the sense that they provide keywords based on the question text and that these keywords are applied consistently if questions or question items are repeated over time (trend variables). Variable label may include abbreviations if required, e.g. limitations regarding the length of variable labels in older versions of statistical analysis software. Starting with Eurobarometer 33 the variable labels include the respective question number as a reference to the basic bilingual questionnaire.

3.2 Coding frames

By general rule, the variables adopt the coding frame as specified in the basic bilingual questionnaire, except multiple response questions (see 1.8), questions with country specific answer categories and missing values.

3.2.1 Country specific answer categories

Eurobarometer include some questions (variables) with country specific answer categories like INCOME, SIZE OF COMMUNITY, REGION or variables related to VOTING BEHAVIOUR with reference to POLITICAL PARTIES. Until Eurobarometer 48 only one integrated variable is supplied with each category representing country specific meanings (e.g. geographic regions) which are not documented within the analysis dataset by means of value labels, but only in the extended variable description in the variable report. Starting with Eurobarometer 49 the integrated variables are retained but complemented by completely labeled country specific variables. The country specific coding schemes and categories are maintained as a standard over time as long as the category schemes

provided in the questionnaire are remain comparable.

Special attention is given to the coding of POLITICAL PARTIES in voting behavior variables such as VOTE INTENTION or LAST VOTE based on a standard coding scheme, originally developed for the Eurobarometer by Ronald Inglehart.

Starting with Euro-Barometer 2 the coding of this variable has been standardized following an approximate ordering of each country's political parties along a "left" to "right" continuum in the first digit of the codes. Parties coded 01-39 are generally considered on the "left", those coded 40-49 in the "centre", and those coded 60-89 on the "right" of the political spectrum. Parties coded 50-59 cannot be readily located in the traditional meaning of "left" and "right". The second digit of the codes is not significant to the "left-right" ordering. Codes 90-99 contain the response "other party" and various missing data responses. Major "party families" like the Social Democrats or Conservatives have been assigned identical values across countries, if possible.

From Eurobarometer 69.2 onwards, the "party family" harmonization approach has been sharpened following and updating the coding scheme developed by ZEUS for the Mannheim Eurobarometer Trend File. This ZEUS Code of Party Families is country specific, i.e. the categories have different meanings for different countries. It has three digits: The first represents the party family, the second and third identify an individual party in this family. Individual parties are coded consistently over time. The assignment of parties to families is done according to their overall ideological orientations.

Table 5: ZEUS Party Family Code (slightly modified)

Category		Party Family
0	(001–099)	not affiliated / electoral alliances across "families"
1	(100–199)	Communists
2	(200–299)	Socialists
3	(300–399)	Liberals
4	(400–499)	Christian Democrats
5	(500–599)	Conservatives
6	(600–699)	Extreme Rights / Nationalists
7	(700–799)	Regionalists / Ethnic
8	(800–899)	Environmental parties
9	(900–949)	Agricultural parties
9	(950–989)	other special issue parties (e.g. Eurosceptics) and independents
	990	other (spontaneous)
	994	not voting age
	995	empty ballot (blank) or invalid vote
	996	not voted / would not vote
	997	Refused
	998	DK / DK+NA if NA not coded separately
	999	INAP (inappropriate)

If available, the former standard category used up to Eurobarometer 61 is always referenced in the variable description. Due to general changes in party systems and to the ideological development of individual political

parties, the assignment of parties to party families cannot claim general validity. Users may modify these codings or part of these codings in order to suit their specific needs.

3.2.2 Missing values

In general missing value codes are defined in accordance with the standard once established for the Eurobarometer series, in particular the default use of whatever value supplied by the basic questionnaire for DK ("don't know") responses, unless a standard coding scheme is applied for demographic or protocol variables. The value 0 is applied for NA (i.e. "not ascertained" resp. "no answer") and the value 9 (99, 999, ...) for INAP (i.e. "inappropriate" resp. "not applicable"). If one of these values falls into the valid range of codes, the missing values are shifted to the next available missing value code or "level", e.g. if 0 is used in a dichotomous variable (NOT MENTIONED), value 9 is used for NA, respectively value 8 if value 9 is already used for INAP. If necessary the corresponding two- or more digit codes are used (99, 999, 98, 998 ...). Recently separate missing values are coded for INAP depending on whether the respondent was not asked a question due to questionnaire routing (filter non-response) or whether the question was not provided for in the country's field questionnaire. Other missing values (e.g. REFUSAL) are coded with the in each case next available code (e.g. 7, 97, 997, ...). In the analysis data set these codes are by default declared and treated as USER MISSING, but may be modified by the user to suit specific needs.

3.3 International documentation standard

The variable documentation is set up in accordance with the international metadata specifications for the social and behavioural sciences, established by the Data Documentation Initiative <DDI>. The variable reports are based on the XML representation of DDI version 2. The documentation combines the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the basic bilingual (master) questionnaire with the variable description (variable name, values, and labels) of the analysis dataset. General remarks and comments referring to a certain variable are defined as variable notes. Notes can be references to trend (comparability) information, standards applied for coding frames, problems in questionnaire translation, but also references to data problems or other specific characteristics.

4 Explanation of the variable documentation

The variable documentation part describes each variable in the analysis data file in terms of relevant metadata and frequency distributions. The variable documentation is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with international metadata standards (DDI-Codebook/XML).

In general, the following abbreviations are used to indicate countries or (sub-national) areas. As far as applicable, the ISO 3166-1 alpha-2 country codes have been applied and coded accordingly in the alphanumeric sample identification variable (NATION - ALL SAMPLES ISO 3166).

AT	Austria	HR	Croatia
BE	Belgium	HU	Hungary
BG	Bulgaria	IE	Ireland
CY	Cyprus	IT	Italy
CY-TCC	Turkish Cypriote Community	LT	Lithuania
CZ	Czech Republic	LU	Luxembourg
DE	Germany (-1989)	LV	Latvia
DE-W	Germany West (1990 ff.)	MK	Macedonia (FYROM)
DE-E	Germany East (1990 ff.)	MT	Malta
EE	Estonia	NL	The Netherlands
ES	Spain	PL	Poland
FI	Finland	PT	Portugal
FR	France	RO	Romania
GB	United Kingdom	SE	Sweden
GB-GBN	Great Britain	SI	Slovenia
GB-NIR	Northern Ireland	SK	Slovakia
GR	Greece	TR	Turkey

The example explained below reproduces the information appearing in the variable documentation part for a typical substantive variable. Results are usually broken down by country (sample) or represented by frequency counts in the case of country specific variables. In the case of variables with long lists of coded "real" values (e.g. age), results are only presented for the corresponding categorized variable, if available. The content and construction of technical, administrative or other generated variables is described as appropriate.

The frequencies for substantive variables are calculated on the base of weighted data, as indicated with each table and in accordance with the European Commission's official Eurobarometer reports. Typically the sample specific post-stratification (redressment) weight is applied (WEIGHT RESULT FROM TARGET or NATION WEIGHT II). Due to rounding, users may find slightly different figures if using other statistical packages, especially if the number of cases is very low.

The complete question and answer texts are taken from the English language part of the respective basic bilingual questionnaire (master questionnaire) as provided by the coordinating fieldwork institute.

Header with DIGITAL OBJECT IDENTIFIER (DOI) linked to the Study Description in the GESIS Data Catalogue.

VARIABLE NAME (serial number assigned by the archive) and VARIABLE LABEL as defined in the dataset.

QUESTION NUMBER and full QUESTION TEXT from the basic questionnaire, including interviewer instructions. The numbers or letters that may appear together with the original question number, reflect the item order (multiple item or multiple response questions) or indicate if a question was recoded (R) or summarized (T), or if asked only in a single country (country abbreviation).

CODE VALUES occurring in the data for this variable and complete ANSWER TEXT from the basic questionnaire. Code values may differ from the questionnaire specification due to standardization. Abbreviations commonly used in the code definitions are DK (don't know), NA (not ascertained) and INAP (inappropriate).

DERIVATION information refers to the construction principle of indices or other derived variables (not in the example). NOTE delineates additional explanatory text subsuming trend information (last appearance of the question) or archive remarks on data processing and other issues relevant for the understanding or application of the variable.

CROSS-TABULATION: The absolute frequencies of the occurrence of values (*absolute values*) refer to the number of cases in the weighted dataset as indicated, in this case *weighted by V8*. The relative frequencies (*row percent*) refer to the valid cases (*n valid sum*), i.e. the total number of cases (*n sum*) reduced by the number of cases defined as missing data (*M*). For display and place saving reasons excluded countries or areas may be completely dropped from the table.

FREQUENCY COUNTS: For country specific variables relative frequencies are calculated in- and excluding missing data (*M*), i.e. *percent* on the basis of all cases (*sum*) and *valid percent* on the basis of the *valid cases*.

Eurobarometer 67.1 - February-March 2007

5 Variable Documentation

Variable, Label
Question Text (English Language)

v1 - ARCHIVE STUDY NUMBER

Archive Study Number

The respective archive has attached this as a unique data collection identification number.

Note:

Actual number is coded.

v1

Value	Label	Missing	Count	Percent	Valid Percent
2490			19477	100.0	100.0
	Sum		19477	100.0	100.0
	Valid Cases		19477		

v2 - ARCHIVE EDITION NUMBER

ICPSR Edition Number

The number identifying the release edition of this dataset.

4   Fourth ICPSR Edition -- February 1998

Note:

Please see variable VERSION ("GESIS ARCHIVE VERSION") for further information on the version number of this data set and the
corresponding release date.

v2

Value	Label	Missing	Count	Percent	Valid Percent
4	4TH ICPSR EDITION (REVISION APRIL 20, 2006)		19477	100.0	100.0
	Sum		19477	100.0	100.0
	Valid Cases		19477		

version - GESIS ARCHIVE VERSION

VERSION AND RELEASE DATE OF THE ARCHIVE DATA SET

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

On occasion of the implementation of this versioning scheme (2010-04-13), the default version number 1.0.0 has been created automatically for this Eurobarometer.

Version 1.1.0 adds the crosstabulation variable ISOCNTRY and the VERSION variable and makes minor errata corrections which are documented on variable level, if applicable.

Former version or edition identification variables are maintained unchanged as a reference to former releases.

version

Value	Label	Missing	Count	Percent	Valid Percent
1.1.0 (2012-07-01)			19477	100.0	100.0
	Sum		19477	100.0	100.0
	Valid Cases		19477		

v3 - ARCHIVE PART NUMBER

ICPSR Part Number

The number identifying this part of a 1-part study.

1   Part one of a one-part study

v3

Value	Label	Missing	Count	Percent	Valid Percent
1	PART ONE		19477	100.0	100.0
	Sum		19477	100.0	100.0
	Valid Cases		19477		

v4 - ID SERIAL NUMBER

Sequential respondent identification number assigned by ICPSR

A unique identification number is assigned to each respondent.

Note:

Actual number is coded.

isocntry - NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

NATION - ALL SAMPLES ISO 3166 (CROSSTABULATION VARIABLE)

All surveyed countries and regions, i.e. including separate samples for East- / West-Germany, Great Britain / Northern Ireland, and the Turkish Cypriot Community (TCC), are coded in accordance with the ISO 3166-1-alpha-2 country code, if available. ISO 3166-2 is applied for the United Kingdom subdivisions. ISO standard codes are not available for the "historical" East / West subdivision of Germany (DE-E / DE-W) and for the Turkish Cypriot Community in northern Cyprus (CY-TCC), the internationally not recognized "Turkish Republic of Northern Cyprus".

isocntry

Value	Label	Missing	Count	Percent	Valid Percent

v6 - W2 WEIGHT SPECIAL UNITED KINGDOM (NAT)

Weight Special United Kingdom

This variable adjusts the British and Northern Irish samples to their respective proportions in the United Kingdom. All nation weights
are included. Norway and Finland are weighted by "zero".

Note:

Unlike the "Nation Weight I" in earlier Eurobarometers up to 31, this weight adjusts all samples to the standard size.

v7 - NATION II (GB AND NORTHERN IRELAND)

Nation II (Great Britain and Northern Ireland separated)

v8 - W3 WEIGHT RESULT FROM TARGET (NAT)

Weight Result from Target

This variable contains weights that adjust the weighted samples to make them representative for the countries from which they were drawn. It reproduces the real number of cases for each EC country. Great Britain and Northern Ireland are treated as independent samples. Norway and Finland are weighted by "zero".

Note:

This weight corresponds to "Nation Weight II" in earlier Eurobarometers up to 31.

v9 - W4 WEIGHT ADJUSTED TO STAND SIZE (NAT)

Weight Adjusted to Standard Size

This variable corresponds to "Weight Result from Target" adjusting all samples to the standard size of 1000 respectively 300 (Northern Ireland) or 500 (Luxembourg) cases. Great Britain (n=1000) and Northern Ireland (n=300) are weighted as independent samples. Norway and Finland are weighted by "zero".

v10 - NATION III (UNITED GERMANY)

Nation III (East and West Germany)

East and West Germany are coded together: United Germany.

	Sum		19477	100.0	100.0
	Valid Cases		19477		

v11 - W1 WEIGHT SPECIAL GERMANY (NAT)

Weight Special Germany

This variable adjusts the East and West German samples to their respective proportions in the united Germany. All EC nation weights
are included and all samples adjusted to the standard size. Norway and Finland are weighted by "zero".

v12 - W5 WEIGHT EURO 6 (NAT)

European Weight 6

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition. This weight includes the six EC founder-members (France, Belgium, Netherlands, West Germany, Italy, and Luxembourg) and includes national weighting for each sample adjusted to the standard size.

v13 - W6 WEIGHT EURO 10 (NAT)

European Weight 10

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries in their historic composition. This weight excludes East Germany, Spain and Portugal. This weight includes national weighting for each sample adjusted to the standard size.

v14 - W7 WEIGHT EURO 12 (NAT)

European Weight 12 (Great Britain and Northern Ireland together)

This variable contains the weight that adjusts each national sample in proportion to its nation's share in the total population of the European Community countries as categorized by Nation I (V5). This weight excludes East Germany.

v15 - W8 WEIGHT EUROPE 12+ (NAT)

European Weight 12+

This variable contains weights that adjust each national sample in proportion to its nation's share in the total population of all the European Community countries. East Germany and Northern Ireland are treated as separate samples. The national weights for each sample are included. Norway and Finland are excluded (weighted by "zero"). Unlike the "EUROPEAN WEIGHT" in earlier Eurobarometers up to 31, this weight contains the adjustment to the standard size.

v16 - W3.1 WEIGHT NORWAY

Weight Result From Target Norway Only

This variable contains weights that adjust the weighted sample to make it representative for Norway. It reproduces the real number of cases. All other countries are weighted by "zero".

v17 - W3.2 WEIGHT FINLAND

Weight Result From Target Finland Only

This variable contains weights that adjust the weighted sample to make it representative for Finland. It reproduces the real number of cases. All other countries are weighted by "zero".

v18 - WN1 WEIGHT SPEC GERMANY (NAT+N-NAT)

WN_1: Weight Special Germany

(Nationals plus Non-nationals)

This variable is analogous to V11, Weight Special Germany, but is for the analysis of the combined national and non-national samples.

Norway and Finland are weighted by "zero". Variable V536 should be used as a filter when applying this weight variable.

v19 - WN2 WEIGHT SPEC UK (NAT+N-NAT)

WN_2: Weight Special UK

(Nationals plus Non-nationals)

This variable is analogous to V6, Weight Special UK, and is for the analysis of the combined national and non-national samples.

Norway and Finland are weighted by quot;zero". Variable V536 should be used as a filter when applying this weight variable.

v20 - WN3 WEIGHT RES F TARGET (NAT+N-NAT)

WN_3: Weight Result from Target

(Nationals plus Non-nationals)

This variable is analogous to V8, Weight Result from Target, but is for the analysis of the combined national and non-national samples.

Norway and Finland are weighted by "zero". V536 should be used as a filter when applying this weight variable.

v21 - WN4 WEIGHT ADJ STD SIZE (NAT+N-NAT)

WN_4: Weight Adjusted Standard Size

(Nationals plus Non-nationals)

This variable is analogous to V9, Weight Adjusted to Standard Size, but is for the analysis of the combined national and non-national samples. Norway and Finland are weighted by "zero". V536 should be used as a filter when applying this weight variable.

v22 - WN5 WEIGHT EURO 6 (NAT+N-NAT)

WN_5: European Weight 6

(Nationals plus Non-nationals)

This variable is analogous to V12, European Weight 6, but is for the analysis of the combined national and non-national samples. V536 should be used as a filter when applying this weight variable.

v23 - WN6 WEIGHT EURO 10 (NAT+N-NAT)

WN_6: European Weight 10

(Nationals plus Non-nationals)

This variable is analogous to V13, European Weight 10, but is for the analysis of the combined national and non-national samples.

V536 should be used as a filter when applying this weight variable.

v24 - WN7 WEIGHT EURO 12 (NAT+N-NAT)

WN_7: European Weight 12

(Nationals plus Non-nationals)

This variable is analogous to V14, European Weight 12, but is for the analysis of the combined national and non-national samples.

V536 should be used as a filter when applying this weight variable.

v25 - WN8 WEIGHT EUROPE 12+ (NAT+N-NAT)

WN_8: European Weight 12+

(Nationals plus Non-nationals)

This variable is analogous to V15, European Weight 12+, but is for the analysis of the combined national and non-national samples.

V536 should be used as a filter when applying this weight variable.

v26 - WO1 WEIGHT SPEC GERMANY (NAT+N-NAT+OV)

WO_1: Weight Special Germany

(Nationals plus Non-nationals plus Oversample)

This variable is analogous to V11, Weight Special Germany, and is for the analysis of the combined national, non-national, and oversample samples. Norway and Finland are weighted by "zero". Variable V537 should be used as a filter when applying this weight variable.

v27 - WO2 WEIGHT SPEC UK (NAT+N-NAT+OV)

WO_2: Weight Special UK

(Nationals plus Non-nationals plus Oversample)

This variable is analogous to V11, Weight Special Germany, and is for the analysis of the combined national, non-national, and oversample samples. Norway and Finland are weighted by "zero". Variable V537 should be used as a filter when applying this weight variable.

v28 - WO3 WEIGHT RES F TARGET (NAT+N-NAT+OV)

WO_3: Weight Result from Target

(Nationals plus Non-nationals plus Oversample)

This variable is analogous to V8, Weight Result from Target, but is for the analysis of the combined national, non-national, and oversample samples. Norway and Finland are weighted by "zero". Variable V537 should be used as a filter when applying this weight variable.

v29 - WO4 WEIGHT ADJ STD SIZE (NAT+N-NAT+OV)

WO_4: Weight Adjusted Standard Size

(Nationals plus Non-nationals plus Oversample)

This variable is analogous to V , Weight Adjusted to Standard Size, but is for the analysis of the national, non-national, and oversample samples. Norway and Finland are weighted by "zero". Variable V537 should be used as a filter when applying this weight variable.

v30 - WO5 WEIGHT EURO 6 (NAT+N-NAT+OVER)

WO_5: European Weight 6

(Nationals plus Non-nationals plus Oversample)

This variable is analogous to V12, European Weight 6, but is for the analysis of the combined national, non-national, and oversample samples. Variable V537 should be used as a filter when applying this weight variable.

v31 - WO6 WEIGHT EURO 10 (NAT+N-NAT+OV)

WO_6: European Weight 10

(Nationals plus Non-nationals plus Oversample)

This variable is analogous to V13, European Weight 10, but is for the analysis of the combined national, non-national, and oversample samples. Variable V537 should be used as a filter when applying this weight variable.

v32 - WO7 WEIGHT EURO 12 (NAT+N-NAT+OV)

WO_7: European Weight 12

(Nationals plus Non-nationals plus Oversample)

This variable is analogous to V14, European Weight 12, but is for the analysis of the combined national, non-national, and oversample samples. Variable V537 should be used as a filter when applying this weight variable.

v33 - WO8 WEIGHT EUROPE 12+ (NAT+N-NAT+OV)

WO_8: European Weight 12+

(Nationals plus Non-nationals plus Oversample)

This variable is analogous to V15, European Weight 12+, but is for the analysis of the combined national, non-national, and oversample samples. Variable V537 should be used as a filter when applying this weight variable.

wght_all - WEIGHT RESULT FROM TARGET - ALL SAMPLES

WEIGHT RESULT FROM TARGET - ALL SAMPLES (EU + NO + FI)

This weight adds WEIGHT RESULT FROM TARGET for EUROPEAN COMMUNITY member countries and parallel surveys
conducted in NORWAY and FINLAND. This variable was produced by the archive and contains the original weighting factors for ALL
SAMPLES
adjusting the weighted samples to make them representative for the countries/areas from which they were drawn. It reproduces the
real number of cases. British and Northern Irish as well as East and West German samples are weighted separately.

v34 - Q1A ELECTORAL REGISTER

Q.1.A

(IF YES)

Are you... (NATIONALITY)?

a) Do you know whether your name appears in the Electoral Register (the register of people entitled to vote at the next General

Election), under your present address, at another address or does not appear at all?

0   NA

1   At present address

2   At another address

3   Don't know if registered

4   Does not appear at all

9   INAP, not available for Finland, coded 16 in V7

v105 - Q35 EUROP ELECTION - NOT VOTE REASON

Q.35

IF CODE 2 TO 6 AT Q.34

What is the main reason why you might not go and vote at the next European elections in June 1994 ?

(SHOW CARD ** -- ONE ANSWER ONLY)

1   I am not interested in politics or elections

2   I am not interested in European elections

3   I lost interest in European matters

4   I have never been interested in European matters

5   I've always been against Europe

6   I am against even more Europe

7   Not well enough informed to vote in European elections

8   I think the result is a foregone conclusion

9   Other reasons (SPONTANEOUS)

10   DK

99   INAP, if respondent will certainly vote (Q.34); not coded 2-6 in V104; not interviewed in Norway and not available for Finland; coded 15 and 16 in V7

Note:

Last trend: EB40 Q.49

The original INRA version of Q37 has apparent errors in coding for responses from Great Britain and Spain.

Accordingly, ICPSR has made the following recodes to Q37:

Great Britain has data values and labels for 7 actual parties. The original Q.37 has: value 8 = 1 case, value 9 = 1 case, value 10 = 1 case, value 11 = 131 cases and value 12 = 18 cases. We believe that value 8 really equals "other party," value 9 = "would spoil your vote," value 10 = "would not vote," value 11 = "DK" and value 12 = "no answer." We left codes 1-7 untouched but changed 8 to 90, 9 to 95, 10 to 96, 11 to 98, and 12 to 0.

Spain has data values for codes 1-8, 10-16, and 18-25. According to the precodes, Spain has 24 categories. However, the original Spanish questionnaire does contain 25 categories (25 equals "no answer"). We used these categories for our recode: codes 1-20 remained unchanged (actual parties), 21 became 90 ("other party"), 22 became 95 ("would vote blank/spoil vote"), 23 became 96 ("would not vote"), 24 became 98 ("DK"), and 25 became 0 ("no answer").

All other countries were recoded according to the scheme: 1-19 = unchanged (actual parties), 20 = 90 ("other party"), 21 = 95 ("would vote blank/spoil vote"), 22 = 96 ("would not vote"), 23 = 98 ("DK", and 25 = 0 ("no answer").

v139 - Q45 CUSTOM CTRL ABOLITION - HEARD ABOUT

Q.45

Also since 1 January 1993, citizens of a (EC & EU (EC)) member country, do not have to pay any taxes when they return into their home country, for products they have bought in other (EC & EU (EC)) member countries at the normal, tax-inclusive price. Have you heard about this or not ?

v178 - Q54F COM CURRENCY EFF: PURCHASING POWER

Q.54

ASK ALL

In the near future, the (EC & EU (EC)) plans to replace the (NATIONAL) currency by the ECU which will then be the single currency in member countries. This replacement will have effects on various areas. For each of the effects which I am going to mention, please tell me if it seems to you important or not important ?

(READ OUT)

Q.54_6 f) Guaranteed maintenance of purchasing power

v208 - Q63 MOTHERTONGUE OF RESPONDENT

Q.63

What is your mothertongue ?

990   Others ("None" in Luxembourg)

998   (NA - includes all cases for Norway and Finland)

in France (FR):

1   French

2   Polish

3   German

4   Patois Auvergnat

5   Danish

6   Spanish

7   Alsacien

8   Arabic

9   English

10   Breton

11   Portuguese

12   Dutch

13   Provencal

14   Russian

15   Yiddish

16   Italian

17   Malgache

18   Armenian

19   Kabyl

20   Yougoslavian

21   Basque

22   Corsican

23   Marocain (Arabic)

24   Vietnamanian

25   Hungarian

26   Malien

27   Occitan

28   Ukranian

29   Houeda (Benin)

30   Laotien

31   Turkish

32   Greek

in Belgium (BE):

1   French

2   Dutch

3   German

4   Greek

5   Luxembourgeois

6   Russian

7   Arabic

8   Italian

9   Others

10   DK

in Netherlands (NL):

1   Dutch

2   Fries

3   English

4   French

5   German

6   Turkish

7   Marocain

8   Surinaams

9   Papiamento

10   Indonesian/Malasian

in Germany (DE):

1   Danish

2   German

3   French

4   Italian

5   Dutch

6   English

7   Spanish

8   Portuguese

9   Greek

10   Polish

11   Russian

12   Rumanian

13   Yougoslavian

14   Turkish

in Italy (IT):

1   Danish

2   German

3   French

4   Italian

5   Dutch

6   English

7   Spanish

8   Portuguese

9   Greek

in Luxembourg (LU):

1 Luxembourgeois

2 German

3 French

4 Italian

5 Portuguese

6 Dutch

7 Yugoslavian

8 Spanish

9 Polish

10 English

in Denmark (DK):

1 Danish

2 Germany

3 French

4 Italian

5 Dutch

6 English

7 Spanish

8 Portuguese

9 Greek

10 Others

11 Undocumented code

99 Undocumented code

in Ireland (IE):

1 English

2 Irish

3 Danish

4 Dutch

5 French

6 German

7 Greek

8 Italian

9 Portuguese

10 Spanish

in Great Britain (GB_GBN):

1 Arabic

2 Bengali

3 Cantonese

4 Danish

5 Dutch

6 English

7 French

8 German

9   Greek

10   Gujerati

11   Hindi

12   Hungarian

13   Italian

14   Mandarin

15   Polish

16   Punjabi

17   Spanish

18   Swedish

19   Sylheti

20   Turkish

21   Ukrainian

22   Urdu

in Northern Ireland (GB_NIR):

1   English

2   Irish

3   Danish

4   Dutch

5   French

6   German

7   Greek

8   Italian

9   Portuguese

10   Spanish

in Greece (GR):

1   Greek

2   Turkish

3   Bulgarian

4   Servocroatian

5   Russian

6   Rumanian

7   English

8   German

9   French

in Spain (ES):

1   Castilian/Spanish

2   Catalonian

3   Basque/Euskera

4   Galician

5   Portuguese

6   French

7   English

8   German

9   Italian

10   Valencian

11   Bable/Asturian

12   Arabic

13   Majorcan

in Portugal (PT):

1   Portuguese

2   Greek

3   Spanish

4   Indian

Note:

Last trend: EB34.0 Q.62

The responses for Belgium and Denmark were left as received from the principal investigators and should be used with caution.

v209 - Q63 MOTHERTONGUE OF R - RECODED

Q.63R

What is your mothertongue ?

0   NA - includes all cases for Norway and Finland

1   Danish

2   German

v379 - Q98 EU BLOOD DONAT PLAN - COMMON POLICY

Q.98

In your opinion, should this plan be achieved by each ((EC & UE (EC)) country separately or by all ((EC & UE (EC)) countries

working together ?

(SHOW CARD **)

0 NA

1 Each ((EC & UE (EC)) country separately (i.e. each country should be self-sufficient in blood)

2 All ((EC & UE (EC)) countries working together (i.e. countries having too much blood should share it with those not having

enough)

v433 - D11 AGE RECODED - 6 GROUPS

D.11R2 AGE RECODED -- 6 GROUPS

0 NA

1 15-24 years

2 25-34 years

3 35-44 years

4 45-54 years

5 55-64 years

6 65 and more years

Derivation:

This variable collapses answers to D.11 into six age groups

Note:

See D.11 for complete question text

v455 - D21B OCCUPATION HEAD OF HH - LAST JOB

D.21.b

IF NOT DOING ANY PAID WORK CURRENTLY - CODE 1 TO 4 IN D.21a / ASK D.20 TO D.22 IF RESPONDENT IS NOT

CONTRIBUTING MOST TO THE HOUSEHOLD INCOME : CODE 2 IN D.19b, OTHERS GO TO D.23

b) Did he/she do any paid work in the past? What was his/her last occupation?

SELF EMPLOYED

1 Farmer

2 Fisherman

3 Professional (lawyer, medical practitioner, accountant, architect,...)

4 Owner of a shop, craftsmen, other self employed person

5 Business proprietors, owner (full or partner) of a company

EMPLOYED

6 Employed professional (employed doctor, lawyer, accountant, architect)

7 General management, director or top management (managing directors, director general, other director)

8 Middle management, other management (department head, junior manager, teacher, technician)

9 Employed position, working mainly at a desk

10 Employed position, not at a desk but traveling (salesmen, driver,...)

11 Employed position, not at a desk, but in a service job (hospital, restaurant, police, fireman,...)

12 Supervisor

13 Skilled manual worker

14 Other unskilled manual worker, servant

0 NA

15 NEVER DID ANY PAID WORK

99 INAP, if "contributing most to the household income" (D.19b), not coded 2 in V452; not "non-active" in D.21a, not coded 1-4 in
V454; not available for Finland; coded 16 in V7

v472 - P6 SIZE OF COMMUNITY

P.6 (Objective) SIZE OF LOCALITY (population size)

0   NA

99   INAP, not available for Finland, coded 16 in V7

99   (No data available for Norway.)

in France (FR):

1   < 2000

2   2000 - 20000 Inhabitants

3   20001 - 100000 Inhabitants

4   > 100000 Inhabitants

5   Paris

in Belgium (BE):

1   Grand Centre

2   Localite Urbaine

3   Localite Secondaire

4   Autre Localite

in Netherlands (NL):

1   < 5000 Inhabitants

2   5000 < 10000 Inhabitants

3   10000 < 20000 Inhabitants

4   20000 < 50000 Inhabitants

5   50000 < 100000 Inhabitants

6   100000 < 400000 Inhabitants

7   400000 Inhabitants and more

in Germany - West (DE_W):

1   < 2000 Inhabitants

2   2000 < 5000 Inhabitants

3   5000 < 20000 Inhabitants

4   20000 < 50000 Inhabitants

5   50000 < 100000 Inhabitants

6   100000 < 500000 Inhabitants

7   500000 Inhabitants and more

in Italy (IT):

1   < 10000 Inhabitants

2   10001 -- 100000 Inhabitants

3   100001 -- 250000 Inhabitants

4   > 250000 Inhabitants

in Luxembourg (LU):

1   < 2500 Inhabitants

2   2500 - 5000 Inhabitants

3   5000 - 10000 Inhabitants

4   10000 - 20000 Inhabitants

5   20000 - 50000 Inhabitants (Esch)

6   > 50000 (Luxembourg Ville)

in Denmark (DK):

1   < 2000 Inhabitants

2   2000 < 4999 Inhabitants

3   5000 < 9999 Inhabitants

4   10000 < 19999 Inhabitants

5   20000 < 49999 Inhabitants

6   50000 < 99999 Inhabitants

7   100000 Inhabitants and more

in Ireland (IE):

1   < 2000 Inhabitants

2   2001 < 20000 Inhabitants

3   20001 < 100000 Inhabitants

4   100001 Inhabitants and more

in Great Britain (GB_GBN):

1   Metropolitan Country

2   Other 100 % Urban

3   Mixed Urban/Rural

4   Rural

in Northern Ireland (GB_NIR):

1   < 2000 Inhabitants

2   2001< 20000 Inhabitants

3   20001 < 100000 Inhabitants

4   100001 Inhabitants and more

in Greece (GR):

1   < 2000 Inhabitants

2   2001 - 10000 Inhabitants

3   10001 - 50000 Inhabitants

4   50001 - 100000 Inhabitants

5   100001 Inhabitants and more

in Spain (ES):

1   < 2000 Inhabitants

2   2001 - 10000 Inhabitants

3   10001 - 50000 Inhabitants

4   50001 - 100000 Inhabitants

5   100001 - 300000 Inhabitants

6 300001 - 500000 Inhabitants

7 500001 - 1000000 Inhabitants

8 > 1000000 Inhabitants

in Portugal (PT):

1 up to 100 Inhabitants

2 101 - 200 Inhabitants

3 201 - 500 Inhabitants

4 501 - 1000 Inhabitants

5 1001 - 2000 Inhabitants

6 2001 - 5000 Inhabitants

7 5001- 10000 Inhabitants

8 10001 - 30000 Inhabitants

9 30001 - 100000 Inhabitants

10 100001 - 500000 Inhabitants

11 > 500000 Inhabitants

in Germany - East (DE_E):

1 < 2000 Inhabitants

2 2000 < 5000 Inhabitants

3 5000 < 20000 Inhabitants

4 20000 < 50000 Inhabitants

5 50000 < 100000 Inhabitants

6 100000 < 500000 Inhabitants

7 500000 Inhabitants and more

v530 - C1 OPINION LEADERSHIP INDEX

C.1 Opinion Leadership (Cognitive Mobilization Index)

0   NA (Coded 0 in Q.4/V38 and 0 in Q.5/V39)

1   High cognitive mobilization

2   Medium-high cognitive mobilization

3   Medium-low cognitive mobilization

4   Low cognitive mobilization

9   INAP, not available for Finland; coded 16 in V7

Derivation:

This variable combines responses to Q.4 and Q.5 to form an indicator of an individual's potential to take an active role in the political process.

CODE 1: Coded 1 for Q.4/V38 and 1 or 2 for Q.5/V39

CODE 2: Coded 1 for Q.4/V38 and 3, 4, 5, or 0 for Q.5/V39; or coded 2 for Q.4/V38 and 1 or 2 for Q.5/V39

CODE 3: Coded 2 for Q.4/V38 and 3, 4, 5, or 0 for Q.5/V39; or coded 3, 4, or 0 for Q.4/V38 and 1 or 2 for Q.5/V39

CODE 4: Coded 3 for Q.4/V38 and 3, 4, or 5 for Q.5/V39; or coded 3, 4, 5, or 0 for Q.4/V38 and 3, 4, 5, or 0 for Q.5/V39

For a complete discussion of this variable and its correlates, see Ronald Inglehart, THE SILENT REVOLUTION: CHANGING VALUES AND POLITICAL STYLES AMONG WESTERN PUBLICS (Princeton University Press, 1977), Chapter 11. This variable is labeled the Opinion Leadership Index in the codebooks for Euro-Barometers 3, 4, 5 and 6.

v531 - C4 SOCIO PROF STATUS (OCCUPATION RECODE)

C.4 Socio Professional Status

0   NA

1   Farmer & fisher

2   Professionals

3   Owner of a shop, craftsmen, other self employed position

4   Business proprietors, owner of a company

5   Employed professional

6   General management

7   Middle management

8   Employed position, working mainly at a desk

9   Employed position, not at a desk but traveling

10   Employed position, not at a desk but in a service job

11   Supervisors

12   Skilled manual workers

13   Other (unskilled) manual worker

99   INAP, not available for Finland; coded 16 in V7

Derivation:

This variable was constructed from responses to D.15A, D.15B, and D.21A.

Roughly half of the representative sample of the European Community public was without paid work. Basing cross-analyses on "occupation" (D.15A) would exclude half of the respondents from analysis. An alternative, also used in past EURO-BAROMETER reports, is to base analyses on a (non-Marxist) concept of "objective social class" using the occupation of the "person who contributes most to the household income" as reference. In order to classify as many respondents as possible with respect to their socio-professional setting, a new classification was created called: "SOCIO-PROFESSIONAL STATUS". For those in paid work it is based on their own present occupation. For those not in paid work, "former occupation" was used where applicable (retired, housewives having been in paid work in the past, temporarily not working, unemployed). For those who have never been in paid work, the occupation of the "person who contributes most to the household income" was used and, if the head of household was not in work at the time of the interview, his or her "former occupation" was used, where applicable.

SOCIO-PROFESSIONAL STATUS is, consequently, a classification "as close to the respondent himself/herself as possible" but drawing upon additional background information to the extent necessary and available, in order to determine the interviewee's socio-professional status, including a maximum of respondents in the respective analyses.

v532 - C11 MEDIA USE INDEX

C.11

MEDIA USE (News on TV, Radio and Papers)

0   NA (Coded 0 or 6 for either V56 or V57 or V58)

1   +++

2   ++

3   - -

4   - - -

9   INAP, not available for Finland; coded 16 in V7

Derivation:

This index is based upon answers to question Q16 (V56-V58):

"About how often do you watch the news in television, read the news in the daily paper, and listen to the news broadcasts on the radio?
"

It combines the answers in the following way:

+++ News on TV, radio and papers every day or several times a week (Coded 1 or 2 for V56, V57 and V58);

++ Two media every day or several times a week, the third medium not more than once or twice a week (Coded 1 or 2 for two of these variables and coded 3, 4 or 5 for the third variable);

- - One of the three media every or several times a week, the two others not more than once or twice a week (Coded 1 or 2 for one of these variables and coded 3, 4 or 5 for the two other variables);

- - - The three media less than once or twice a week (Coded 3, 4 or 5 for V56, V57 and V58).

v533 - C12 EUROP SOCIAL GRADE (ESOMAR)

C.12 European Social Grade (ESOMAR 7-point scale)

0   NA/INAP
1   A
2   B
3   C
4   D
5   E1
6   E2
7   E3
9   INAP, not available for Finland; coded 16 in V7

Derivation:

This scale is based on the recommendation of the European Society for Opinion and Marketing Research (ESOMAR) to harmonise the measurement of social grade across borders.

This approach uses three different types of input variables:

I) Occupation of the main income earner (MIE) is based on a classification into 16 groups (E1 to E16) of the occupation of the Main Income Earner:

E1 General management, director or top management (6 employees or more)

E2 Self employed professional

E3 Employed professional

E4 General management, director or top management (5 employees or less)

E5 Middle management, other management (6 employees or more)

E6 Middle management, other management (5 employees or less)

E7 Business proprietors, owner (full/partner) of company and owner of a shop, craftsmen, other self employed (6 employees or more)

E8 Employed position, working mainly at a desk

E9 Business proprietors, owner (full/partner) of company (5 employees or less)

E10 Student

E11 Employed position, not at a desk but traveling or in a service job

E12 Farmer and fisherman

E13 Responsible for ordinary shopping and looking after the home, housewife

E14 Supervisor and skilled manual worker

E15 Other (unskilled) manual worker, servant

E16 Retired or unable to work through illness, unemployed or temporarily not working

II) The education level of the main income earner (MIE) is based on a classification into 6 groups of education level (adjusting the finishing age of general education in accordance with extra general education or specific apprenticeship and/or professional training):

1) up to 14 years;

2) 15-16 years;

3) 17-18 years;

4) 19-20 years;

5) 21-24 years;

6) 25 years and over.

III) Household ownership of selected durables is based on ownership in terms of number of products owned (D.14): a colour TV set, a video recorder, a video camera, a radio-clock, a PC/home computer, a still camera, an electric drill, an electric deep fat fryer, two or more cars, and a second home or a holiday home/flat.

The combination of these input variables results in a new social grade classification with the following categories (upper to lower): A B C D E1 E2 E3. For more details see standard report EUROBAROMETER 1, July 1994, Brussels, A58-A59. (SCALED on the basis of all active and non-active main income earners as constructed by the original investigator.)
